Becketts will manufacture a slicer to meet your needs, cut through or side hinged, whatever the product you want to slice.

Designed and built for heavy workloads and medium to high volume.

- Adjustable blade height to accommodate a wide range of products
- 500mm belt width as standard
- Variable speed belt and blade
- Stainless Steel Construction and castors
- Total flexibility in the configuration or individual machines allows specific product requirements to be accommodated.
- The head position is adjustable for products of up to 100mm with slice height also being controllable.
- Multiple heads can be mounted on the same conveyor for cutting sponge sandwiches.
- The Disc slicer is a two lane, horizontal circular blade machine with a product height of upto 50mm and a depth of cut at 150mm.
- It can hinge or cut through the product.

There are three types of machine:-

- Band slicer for horizontal cutting applications
- Disc model for hinged products
- Vertical reciprocating blade machine
